Airpura AIR PURIFIERS

I-600

Healthcare

Isolation, Particle Abatement
UV option for Antigen and Pathogen Sterilization

The Airpura I-600
Specially designed for use in healthcare clinics and institutions.

Large HEPA filter
Traps airborne droplets.

Optional UV germicidal lamp
Sterilizes antigens and pathogens.

Optional HI-C carbon weave
Adsorbs odors and airborne chemicals and gases.

Effective for up to 2000 square feet
Recycles the air approximately every 30 minutes.

Optional negative air accessories available
Enables you to quickly create an isolation area.

Solid easy to move, lockable casters
Weighs less than 30 lbs. Moves easily and casters can be locked in place.

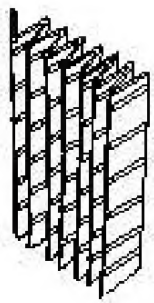
The Airpura I-600

Available in
White / Black / Cream

The Airpura Limited Warranty
2 years parts 5 years labor

High Quality HEPA Filter

- Over 100 square feet of filtration surface with 3" deep folds.
- The Hepa is warm rolled to avoid cracking at the folds and avoid leakage.
- Spacers keep the folds open and make sure that all the surface area is filtering.



Filter Life

Hepa filters typically last 5 years in regular use.
Pre-filters can be vacuumed from the exterior of the unit and should be changed preferably every 3 months depending on use.
HI-C carbon weave (optional) should be changed every 4-6 months depending on use.

Safe effective air filtration with negative air option

Technical Specifications

Particle removal
Over 100 sq ft true HEPA
(Measured only 1 side)
10 pleats per inch
Pleats warm rolled
with separators

Odor and chemical Suppression (Optional)
306 sq" HI-C carbon weave

Air Flow 560 cfm
More cfm than any
other home unit available

Pre-filter
570 sq in x 1in deep

Housing
Powder coat steel

Size
23" x 15"

Weight
35 lbs total

Voltage Options
115 or 220 volts

Watts
120 on high 40 on low

Sound Level
28.1 db on low (at 6 feet)
62.3 db on high (560 cfm)
(Room level 25.1 db)

ETL Certified
Conforms to
CSA C22.2 no 113
ANSI / UL 507

Your Airpura Dealer

Unique Features

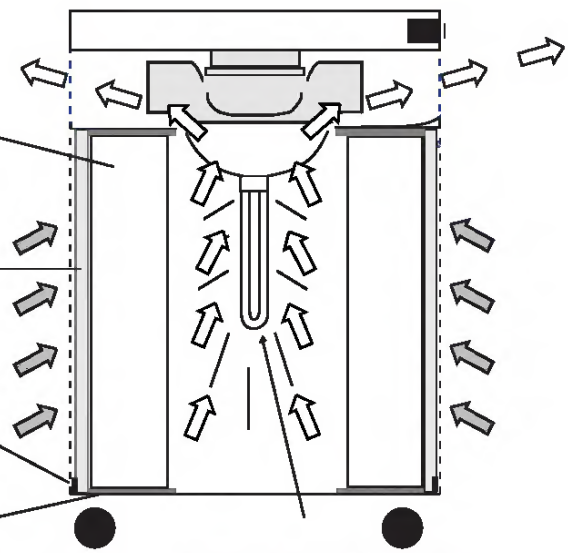
- Pressure seal Airpura's unique pressure seal on the filter chamber ensures that all of the dirty air passes through the filters. Other systems allow leakage and do not achieve the 99.97% HEPA filtration rating
- Felt gaskets seal the filter chamber. Maximize filtration with no rubber off-gassing found with other filters
- All metal housing ensures no plastic vapors are emitted
- Backward curved motorized impeller eliminates the vibrations and noise associated with older motor and shaft set ups
- Variable speed motor lets you choose your ideal level of filtration
- Motor out of the air flow. Most air purifiers blow the clean air over the motor and pick up fresh impurities
- Unimpeded airflow simple and direct internal airflow avoids the air turbulence, inefficiency and noise associated with more convoluted systems
- Separate electrical parts chamber prevents any off gassing from capacitors, condensers or switches.
- Perforated steel exterior offers both a softer appearance and 360 degree air intake and distribution.
- Separately changeable filters The Hepa and carbon filters can be changed separately so you only change them when appropriate and save operating costs

Filtration System

Large 3" deep HEPA filter
Traps 99.97% of particles as small as 0.3 microns

Cleanable prefilter
Vacuum through grill and change every 12 months

Unique Pressure seals
ensure integrity of filter chamber



Felt gaskets
no rubber off gassing

Optional UV Lamp

True HEPA Filters
Developed by the atomic energy commission to filter radio active particles as small as 0.3 microns

Hi-C Carbon weave
Also known as paratrooper carbon, it is used to protect soldiers from poisonous gases and chemical warfare

Large scale HEPA filtration protects against airborne particles
